

beams

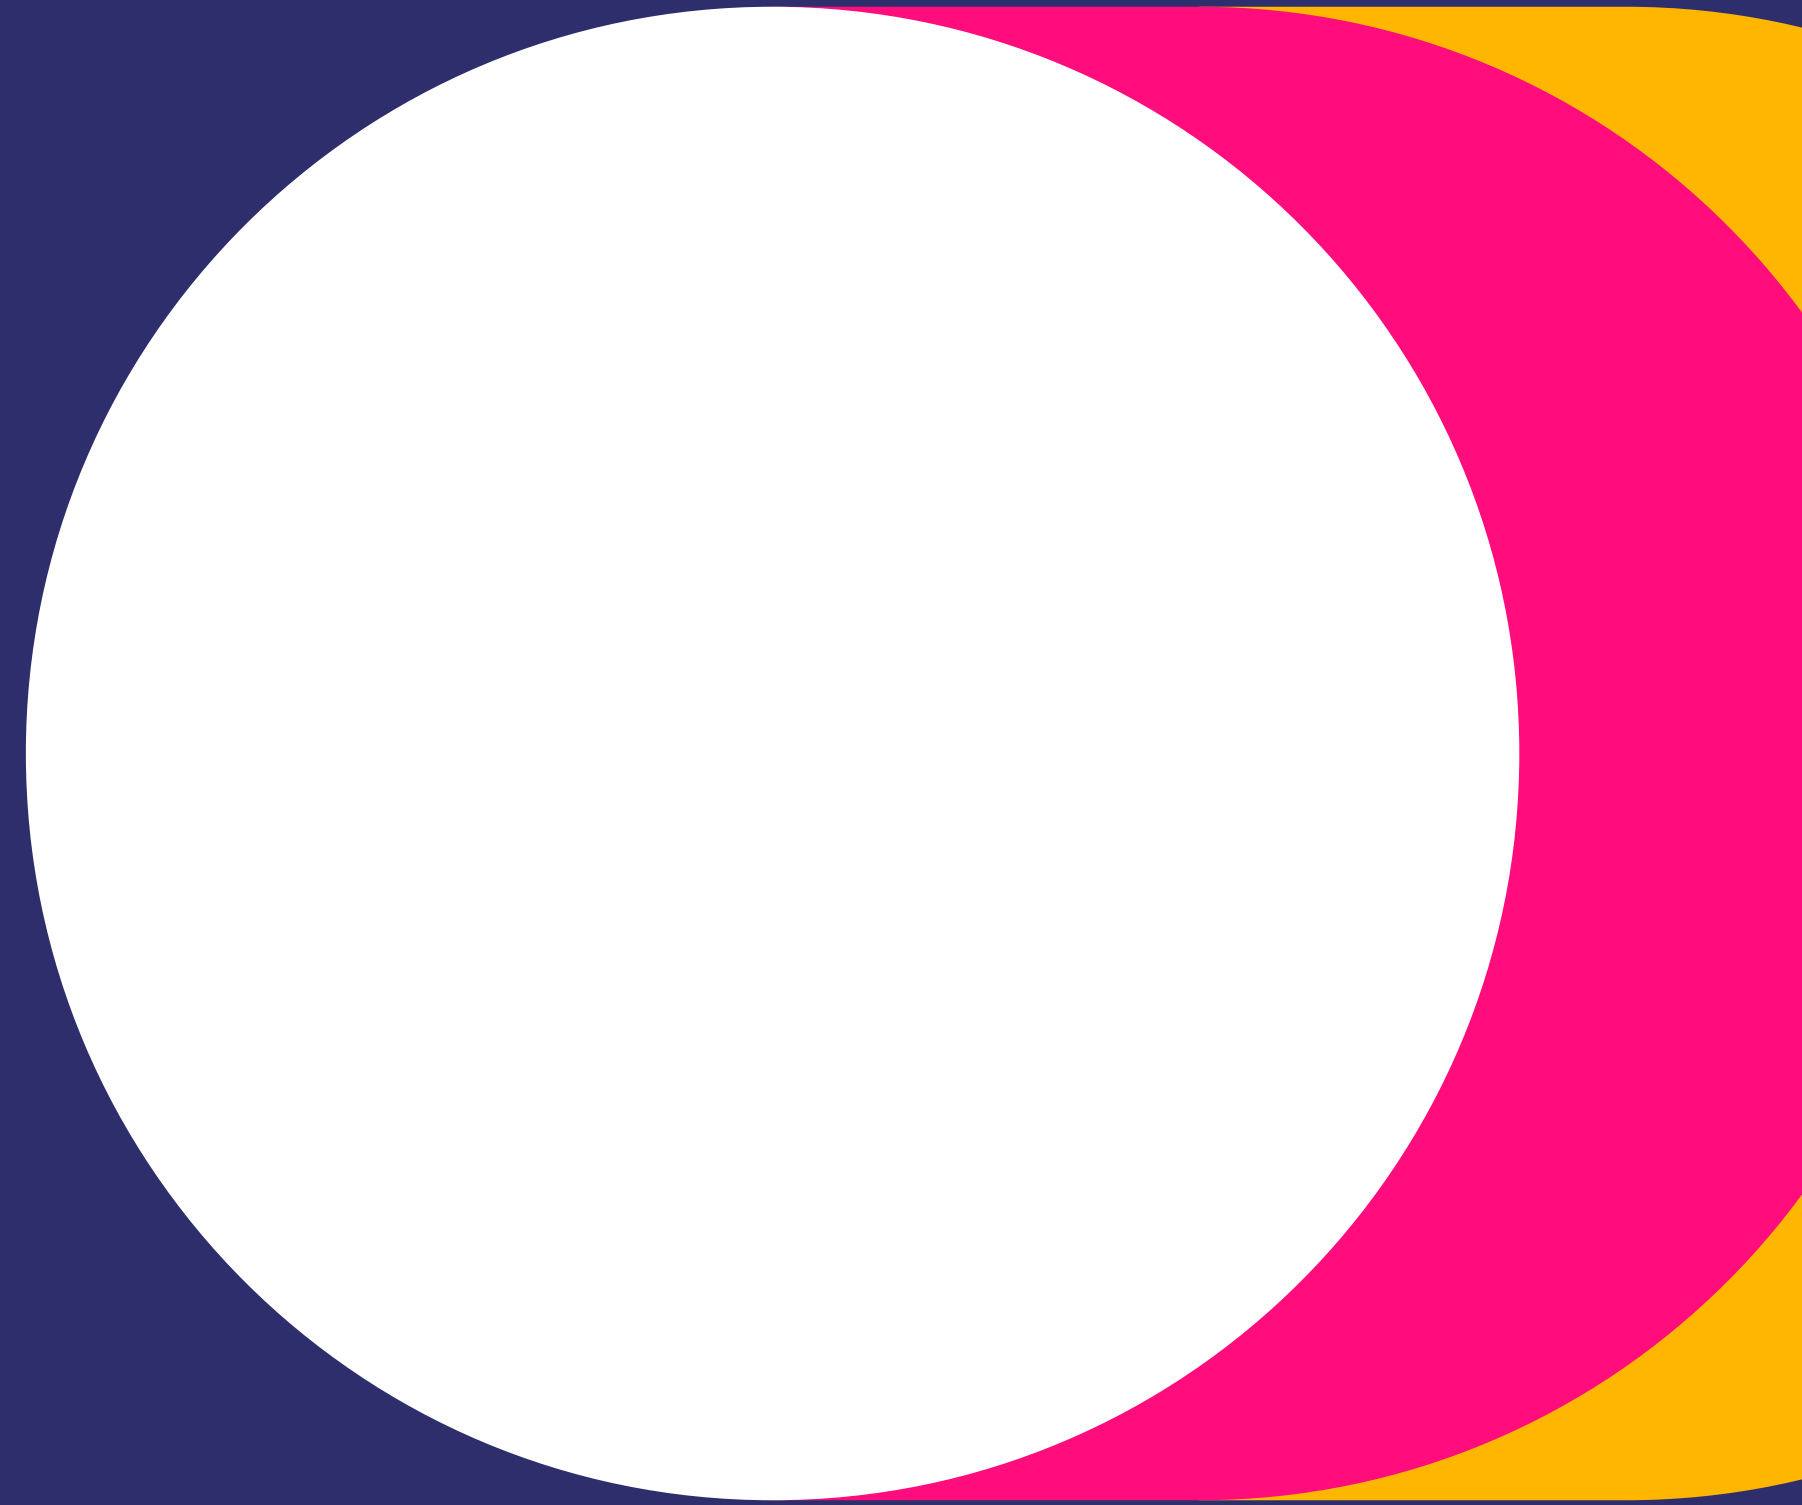

Host large-scale online and hybrid events

Beam is an interactive live streaming platform that connects people around the globe by means of virtual event management software. We are trusted by the world's largest events with speakers from Microsoft, Facebook, Google, Nike, TikTok and other companies.

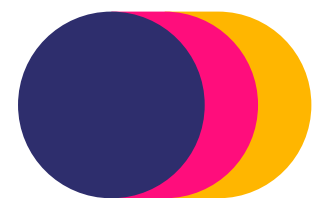

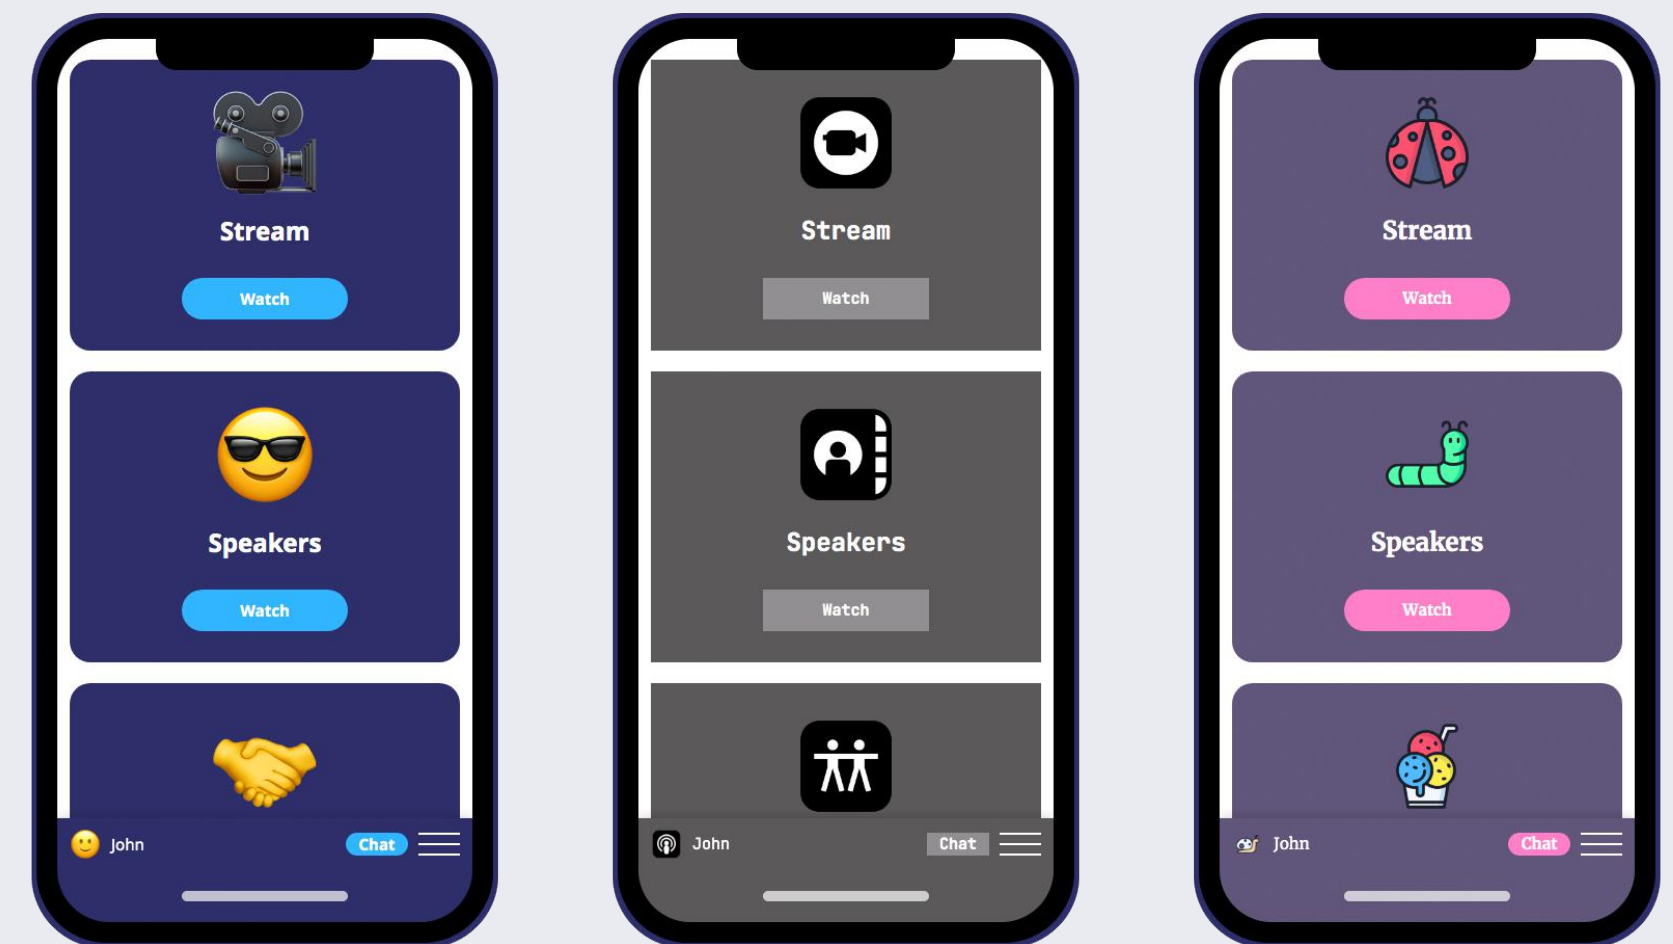

Why Beams

Customization

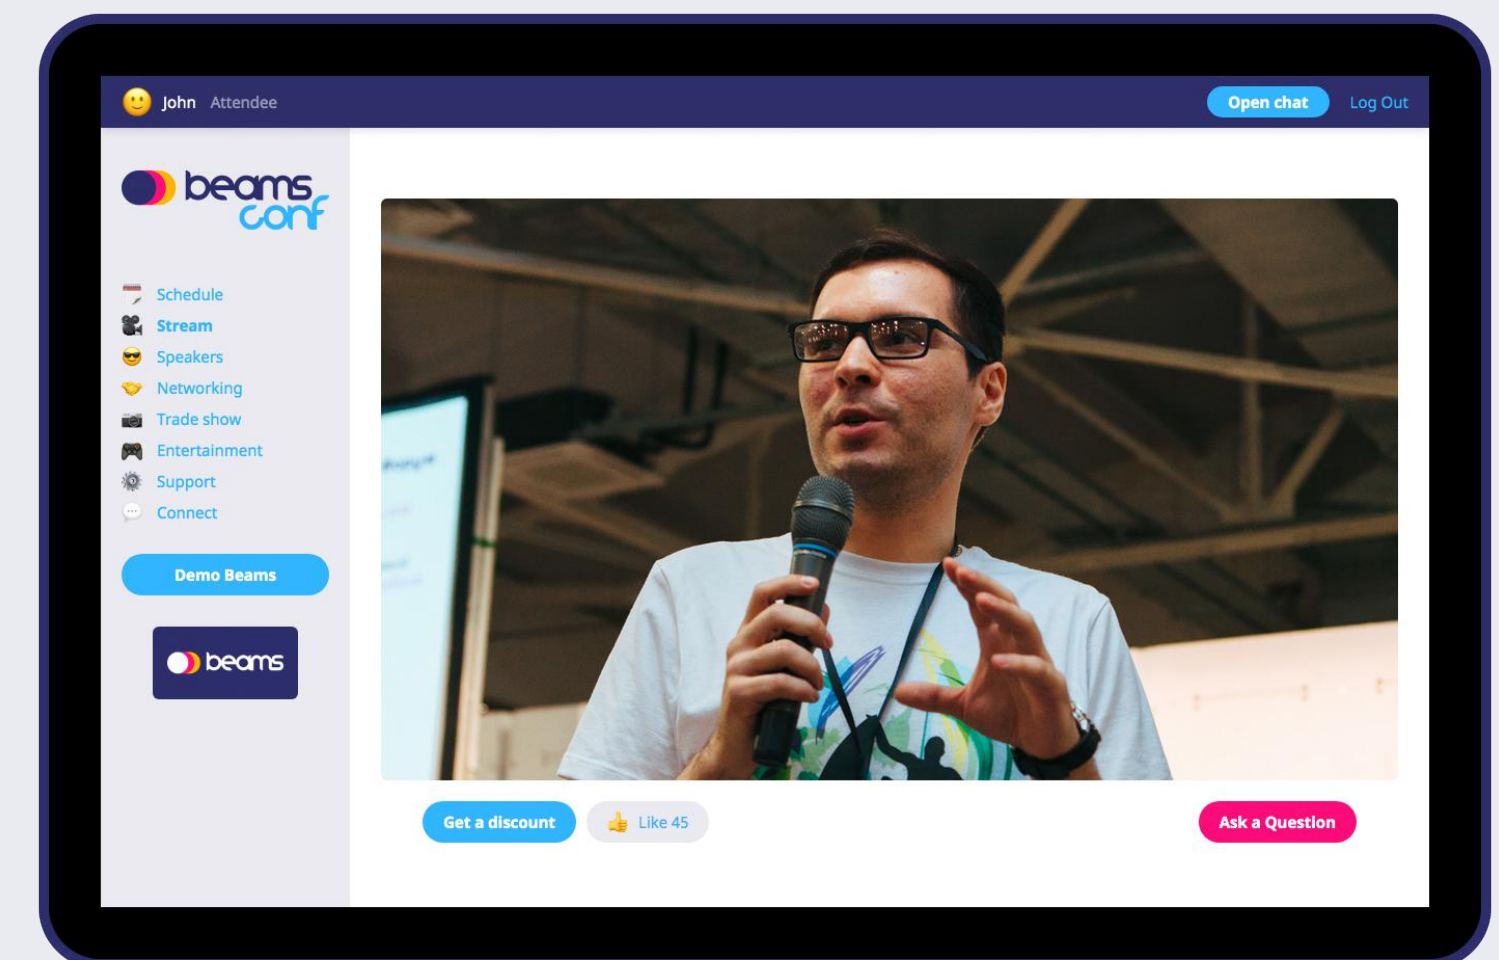

Flexible settings allow you to both customize the event for the brand identity and use ready-made templates and solutions.

Broadcasts

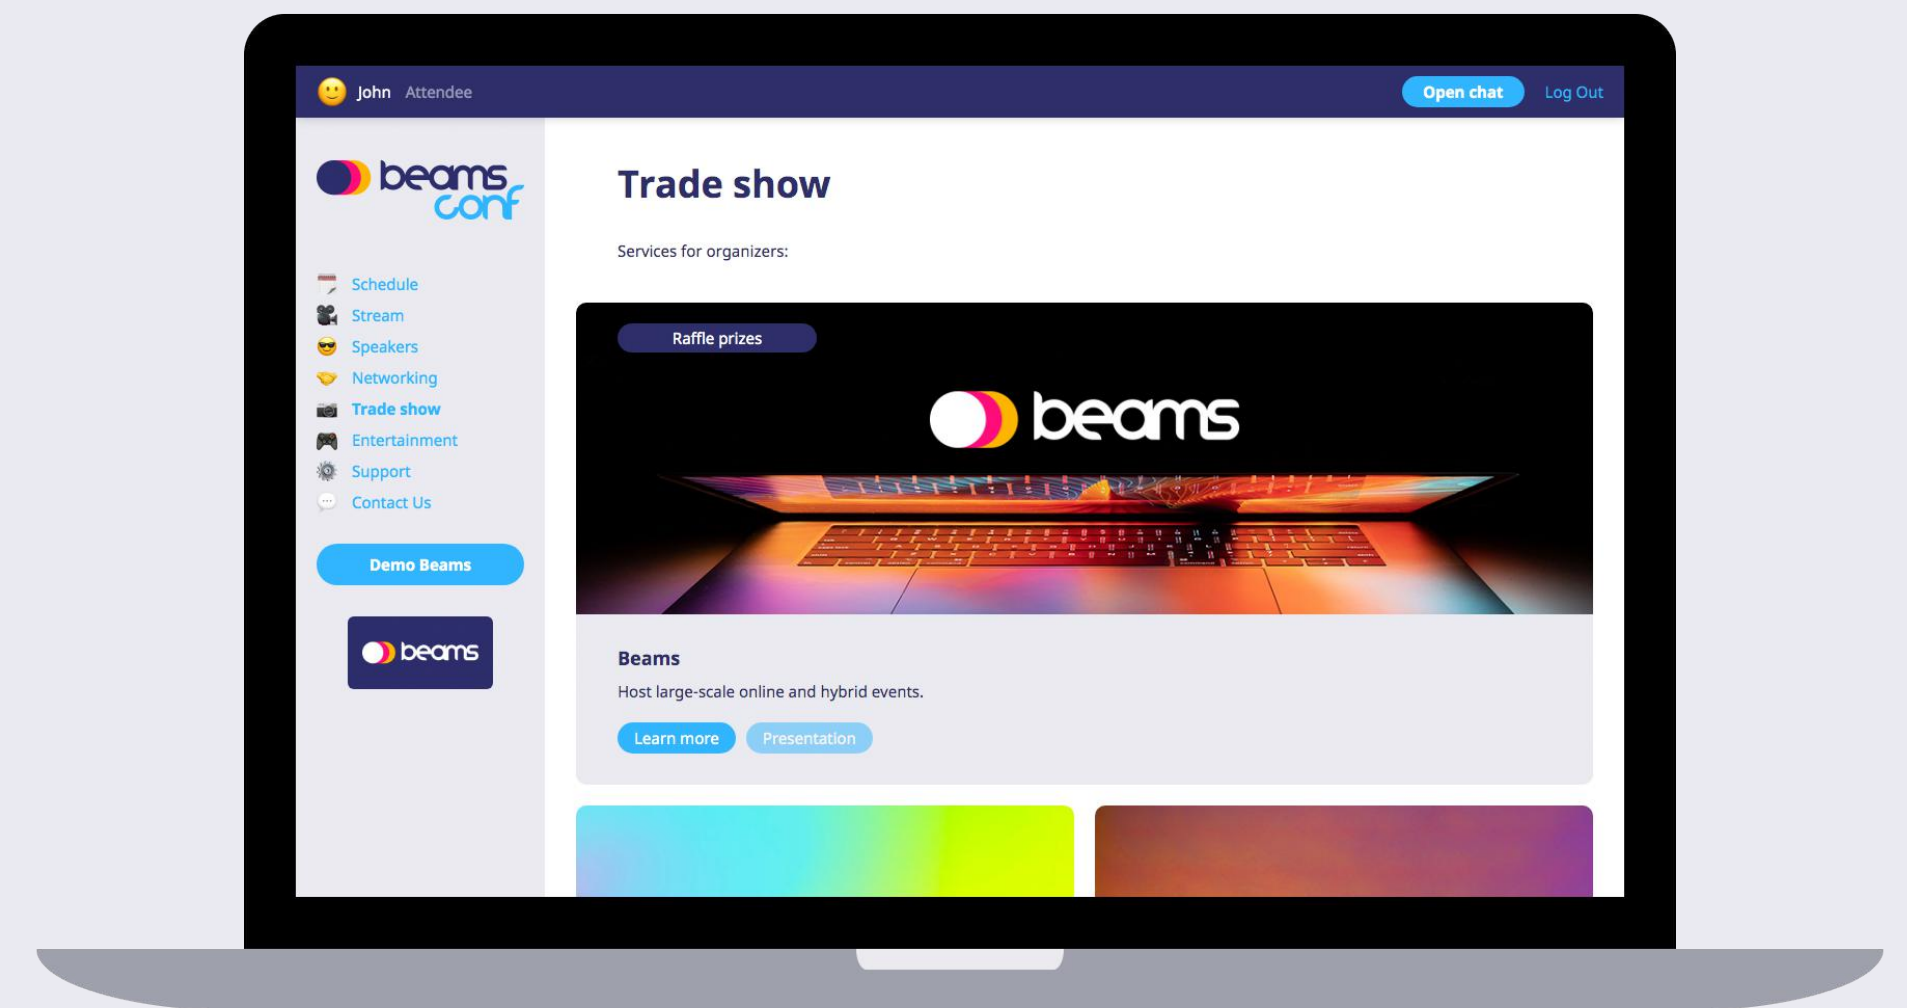

Make your broadcast alive and increase attendee engagement using the interactive solutions and integrations — live chats, QnA, live polls and even the opportunity to 'like' speakers.

You can connect Beams to any livestream provider such as Youtube, Facecast, Vimeo and others.

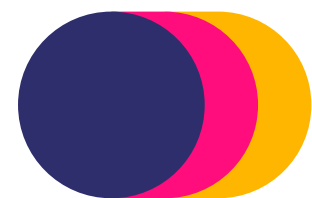

Fairs & Trade shows

Extend sponsor reach and help your partners connect with attendees — add interactive blocks with all the necessary information about each sponsor, from a logo with a description and a video about the company to a chat with its representatives. Integrate Beams with third-party platforms to empower your trade show.

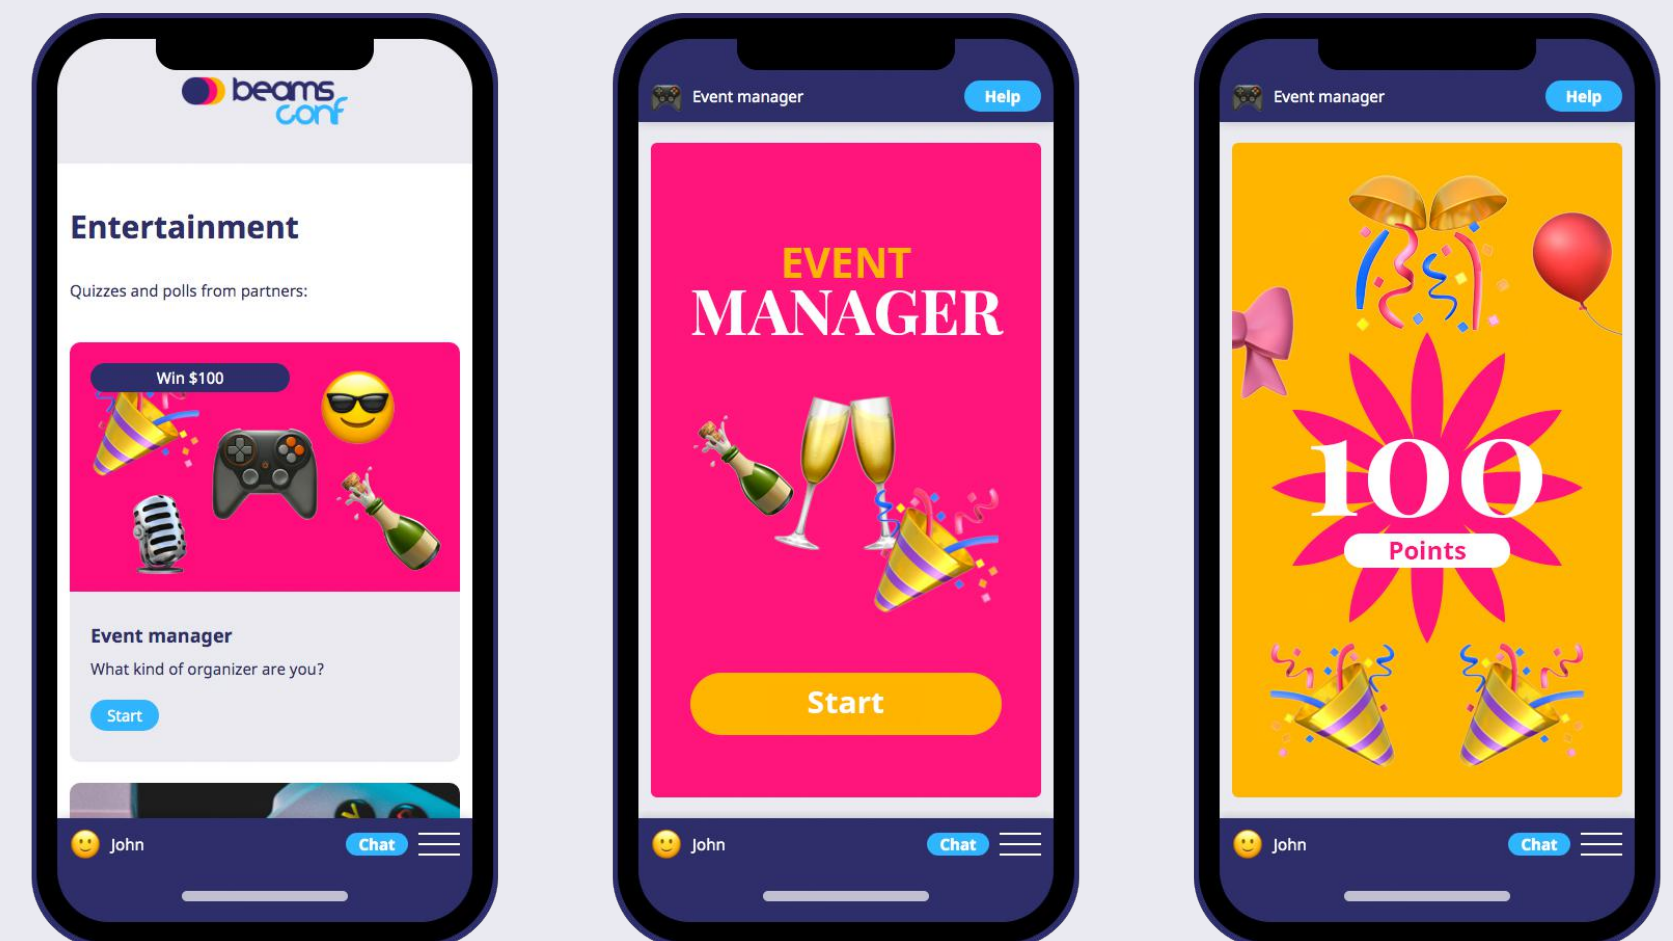

Networking

Diverse networking opportunities from public and 1-on-1 live chats to Google-powered online rooms — handle up to 250 connections simultaneously! You can do it directly in Beams or integrate the platform with third-party solutions for networking.

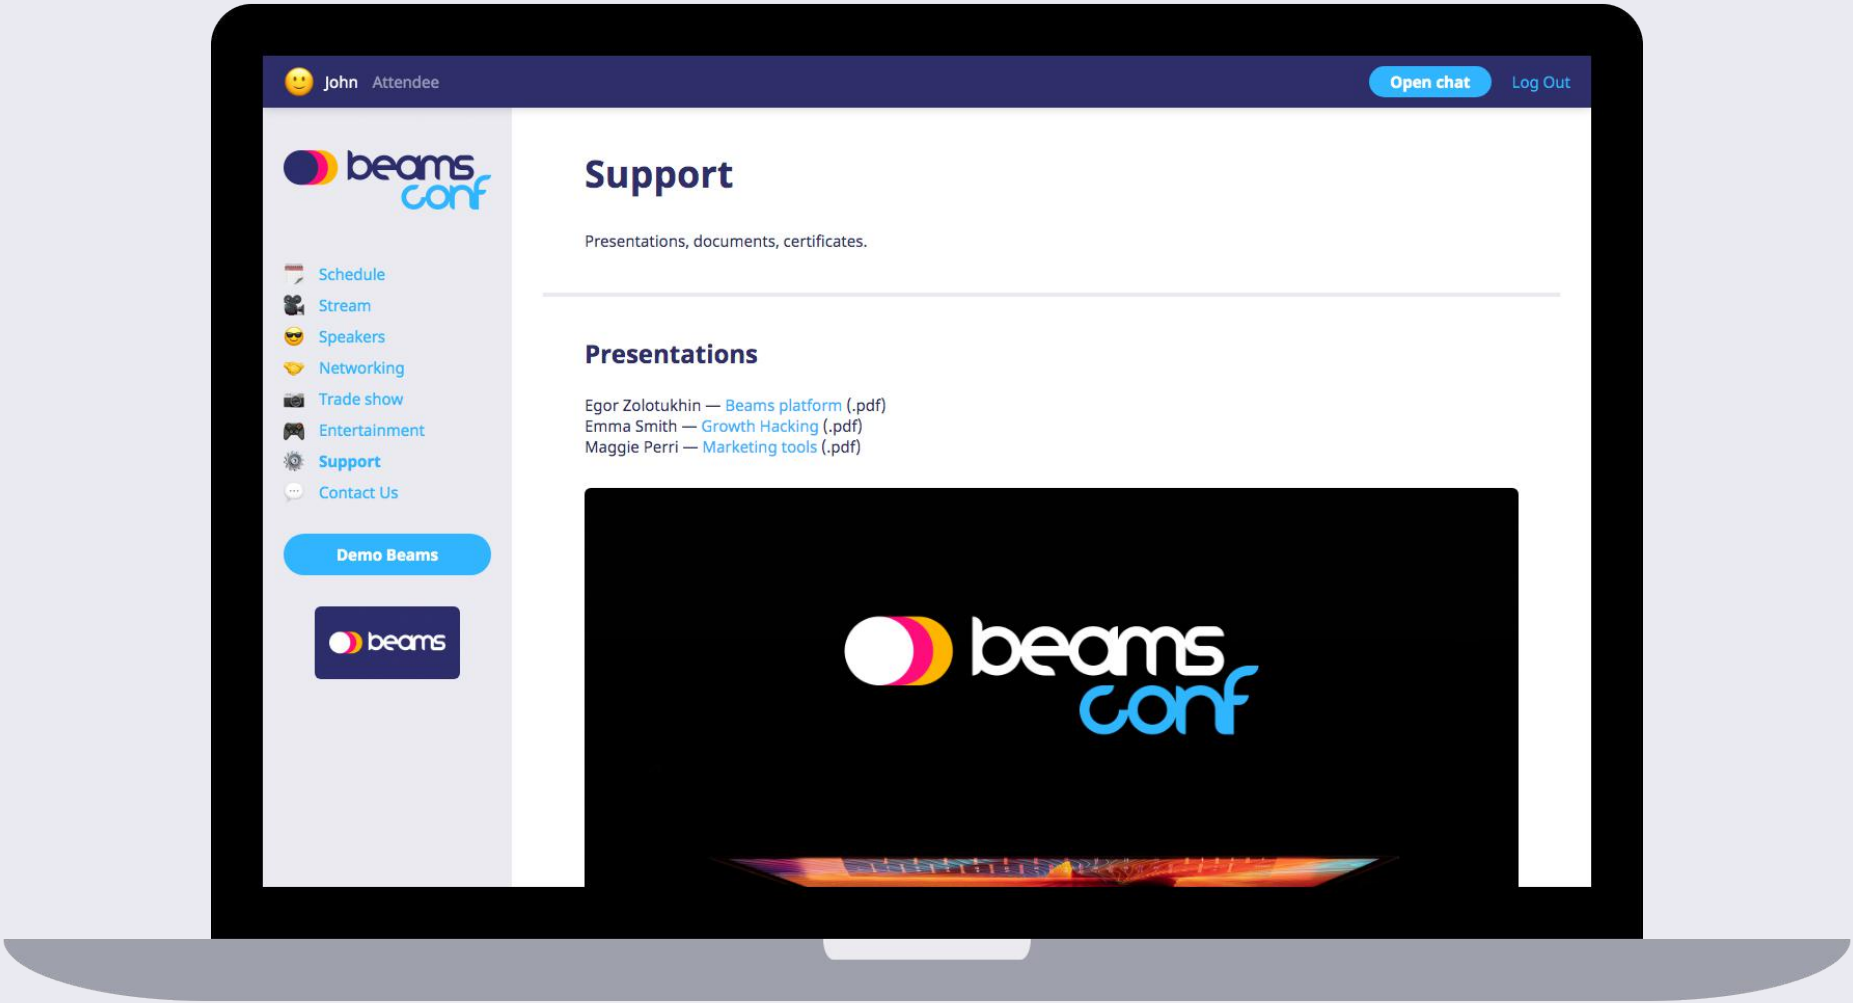

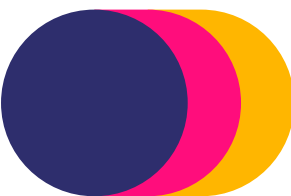

Interactive Content

Create and add quizzes, tests and polls to immerse attendees in all areas of the event. You can do it directly Beams or integrate the platform with third-party solutions.

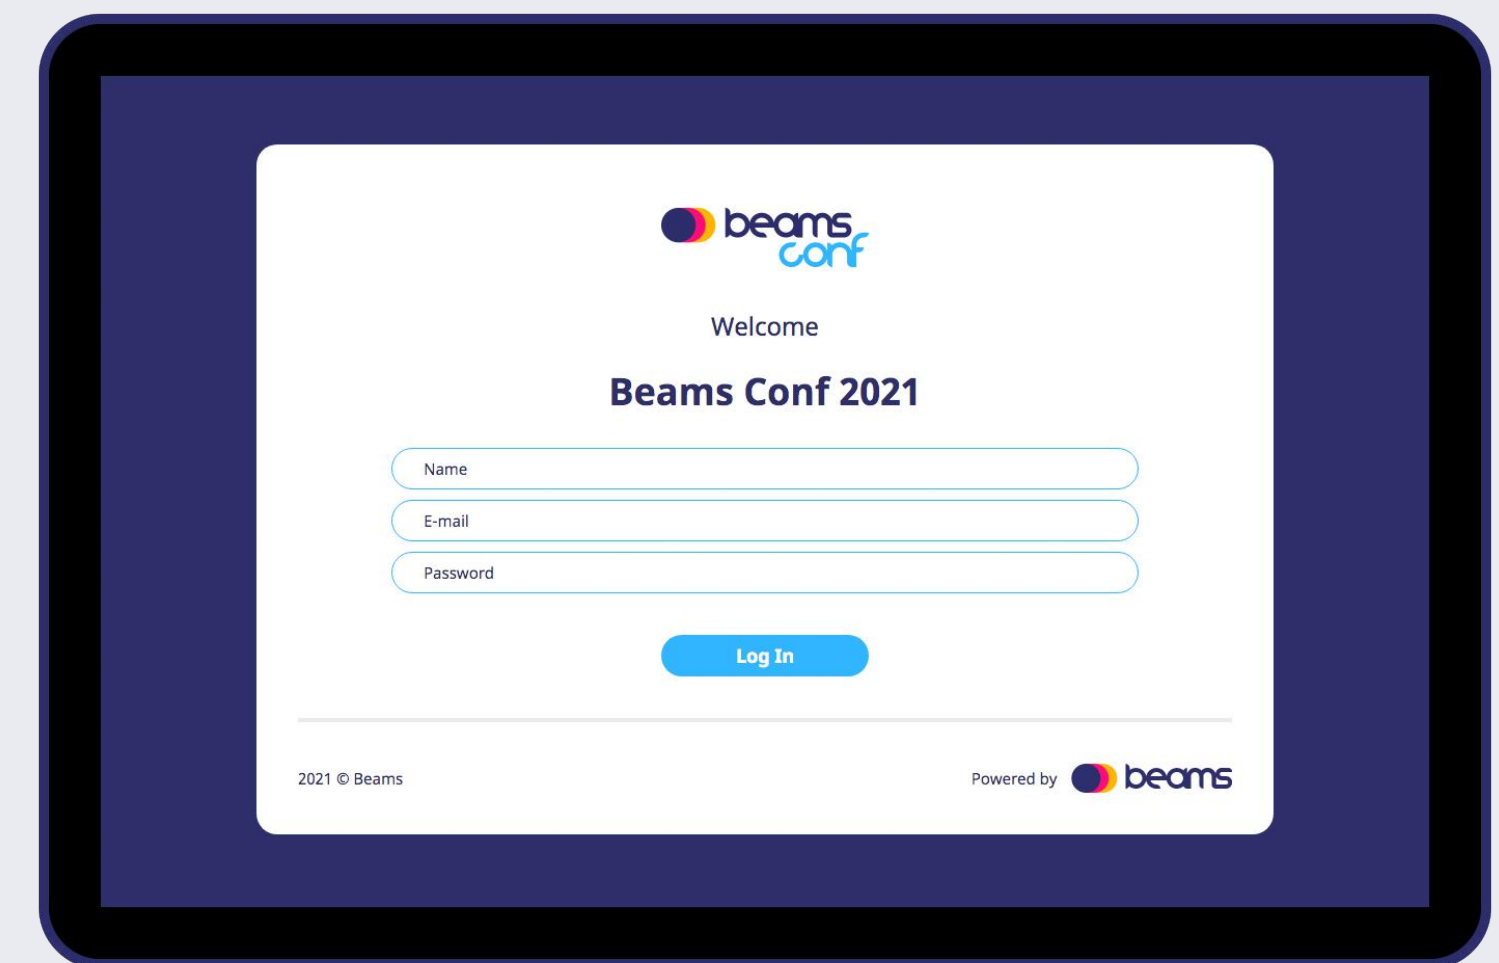

Documents and files

Upload all the necessary documents and files related to an event — speaker presentations, videos, reports, attendee certificates, and other files. This will help your attendees more easily learn and catch the speaker's idea.

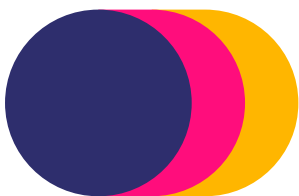

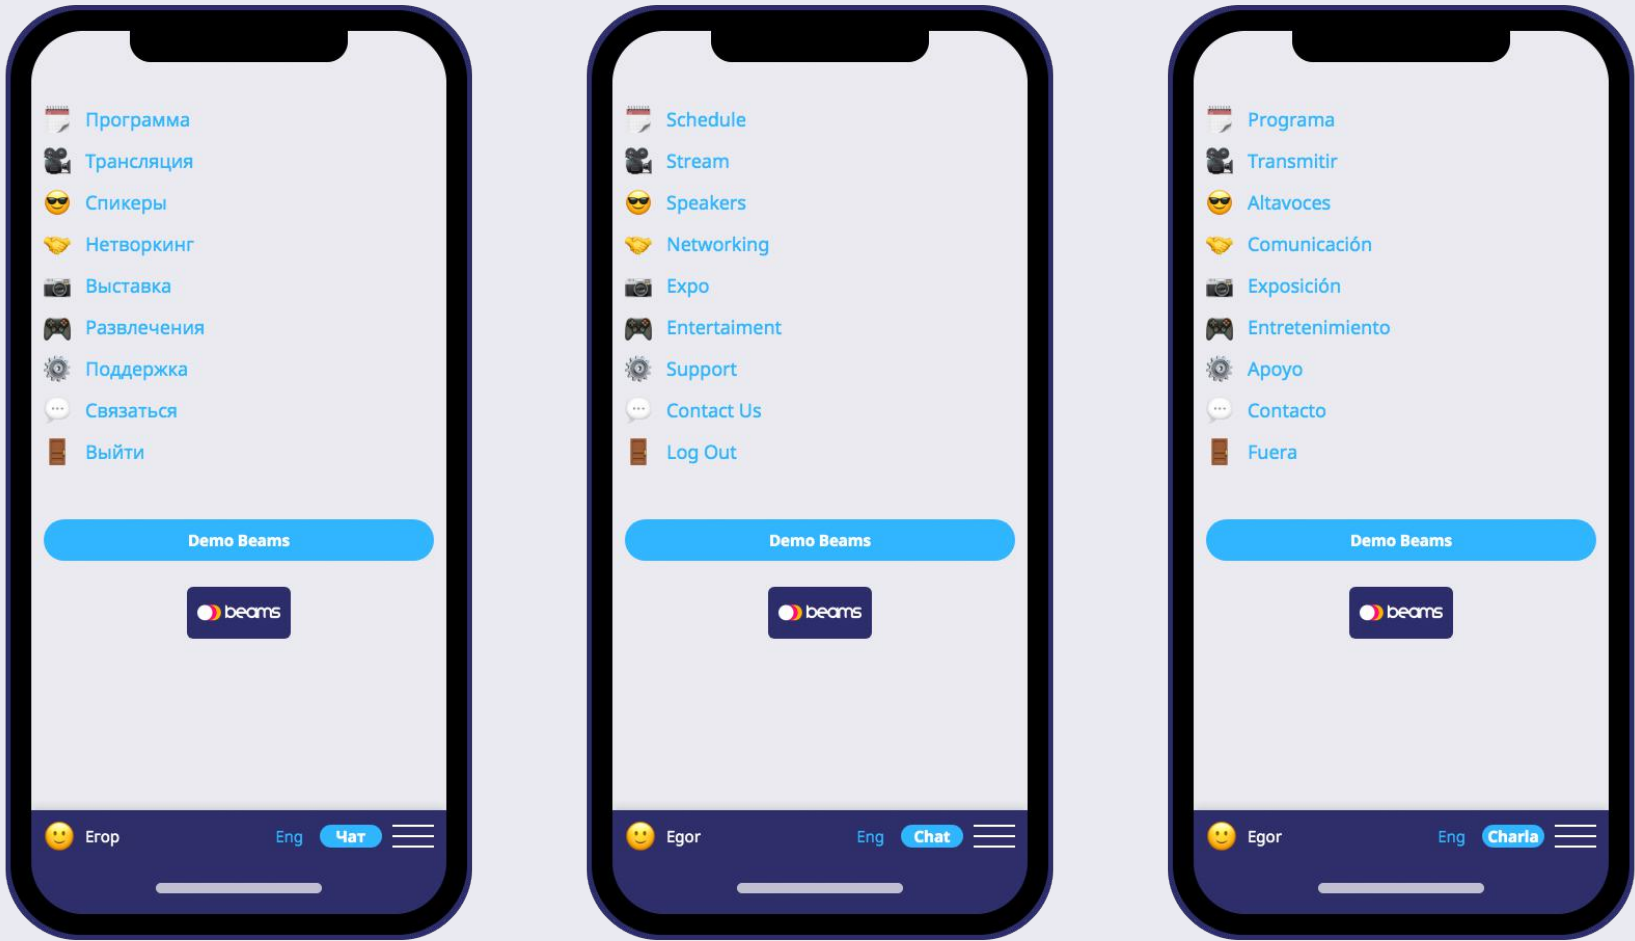

Privacy and security

Access settings are customizable, so you can host both private and public events and even create hidden sections accessible only to selected audience.

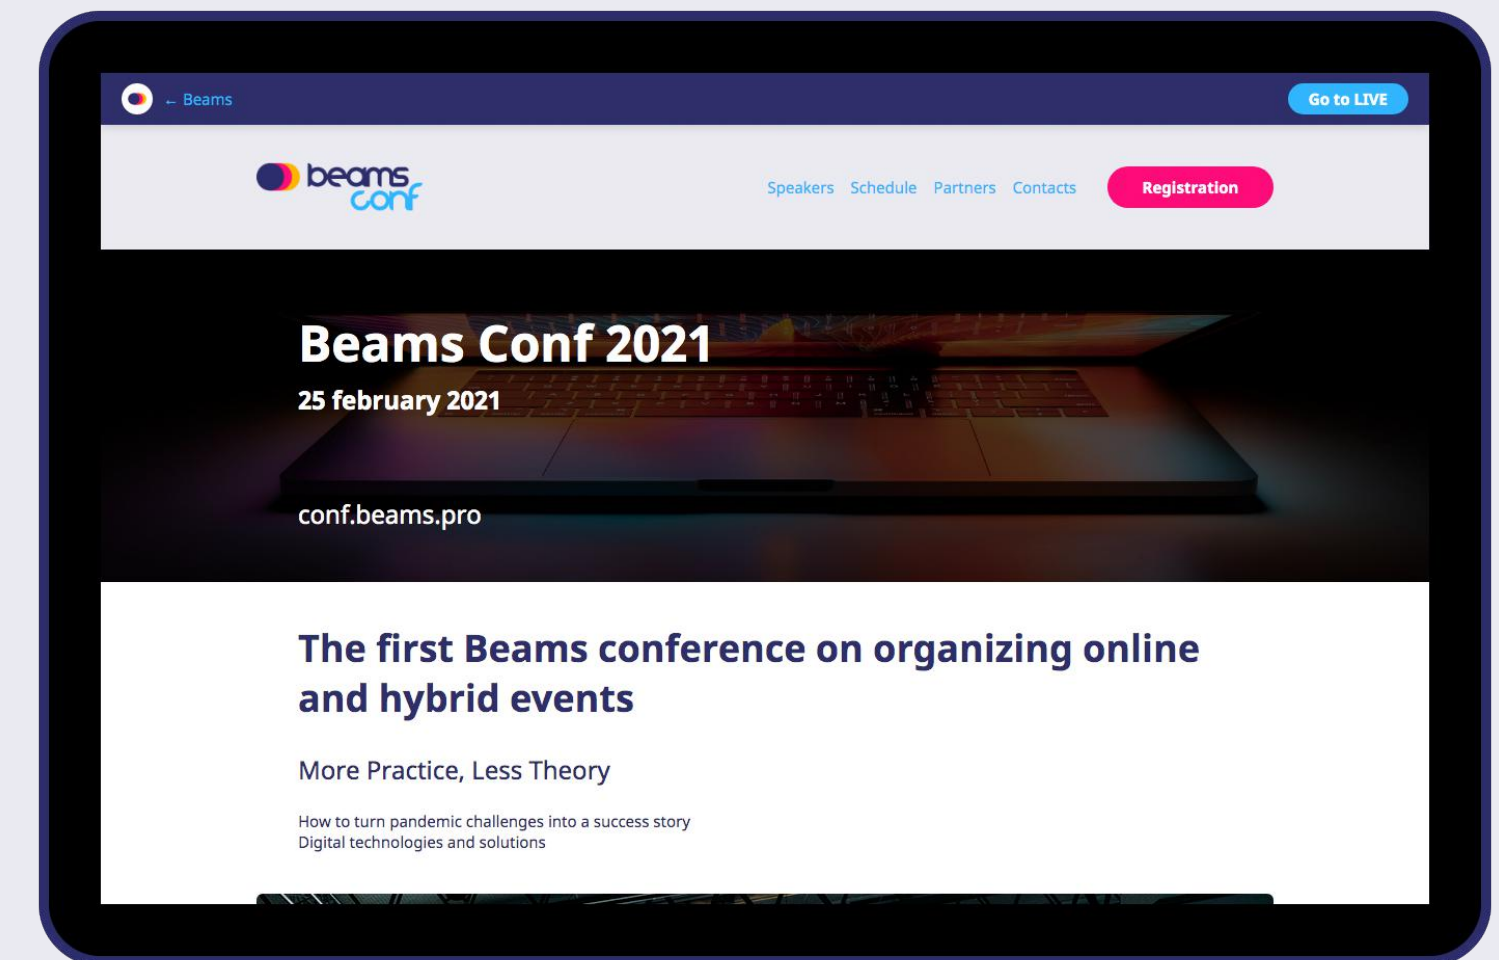

Multi-language interface

Host your event in multiple languages at once. Flexible platform settings give an opportunity to set the interface language according to the specified conditions.

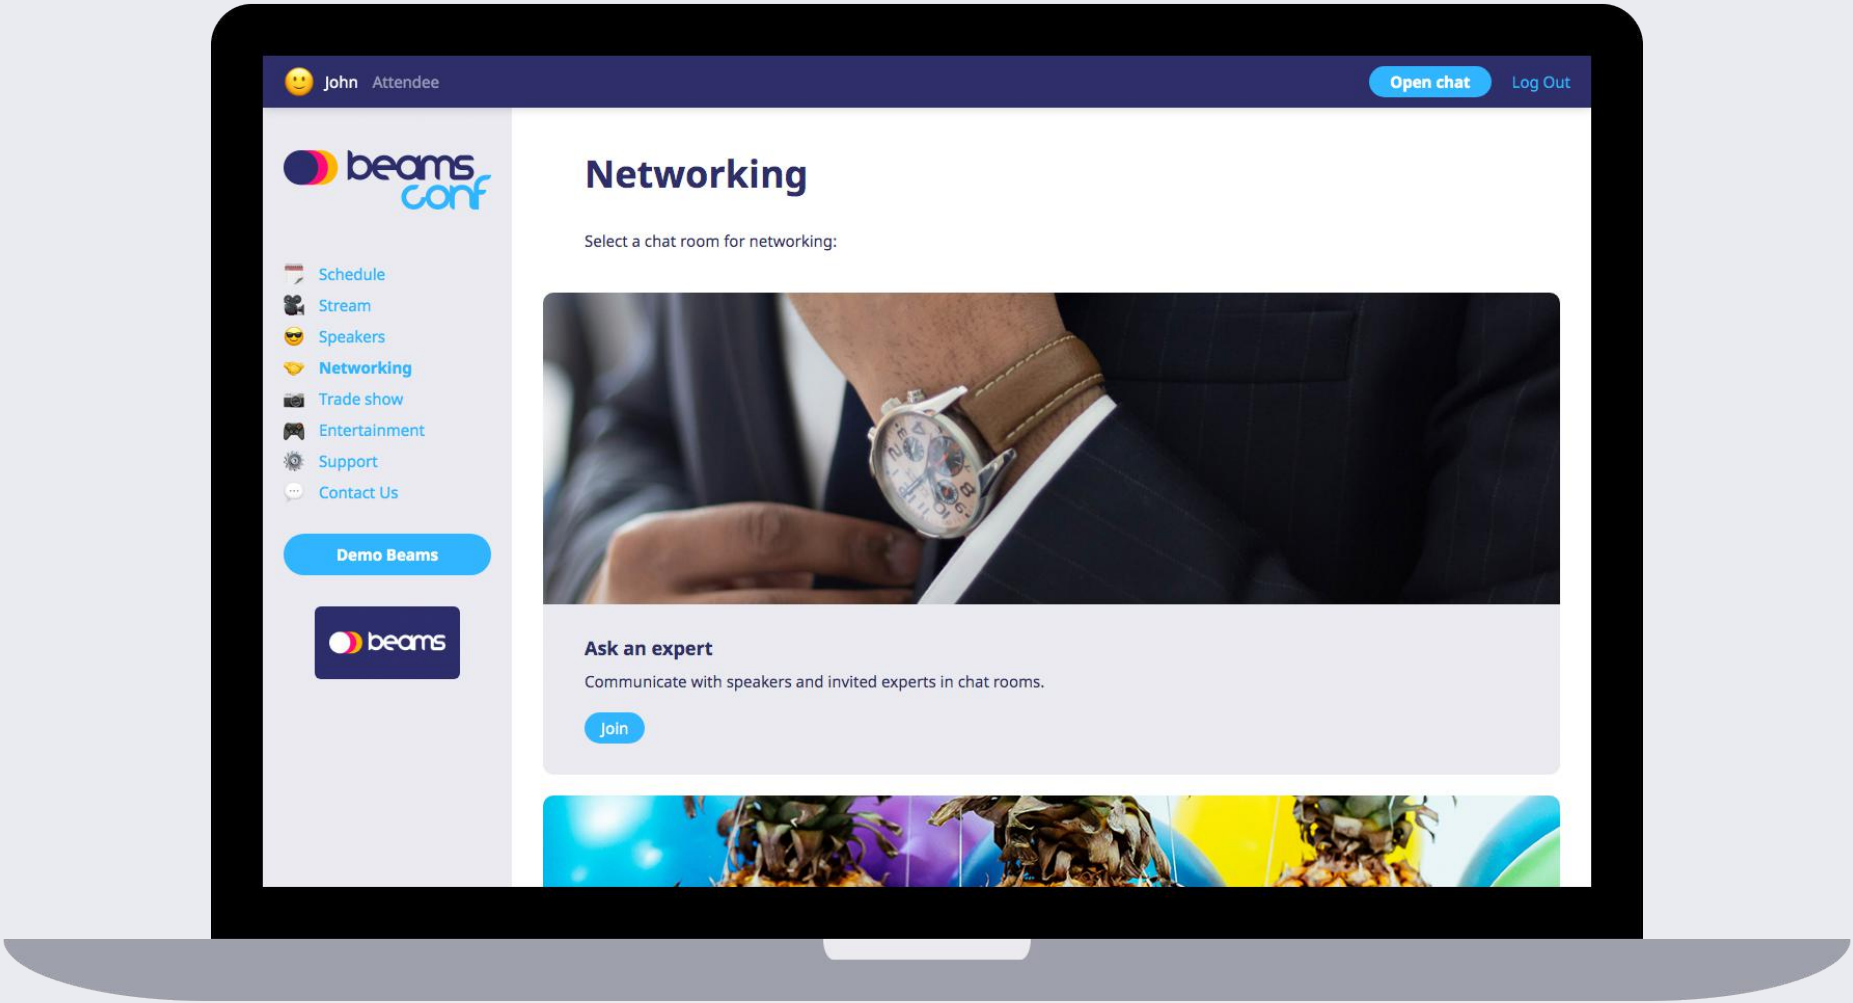

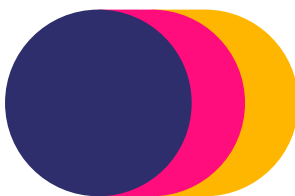

Event page

Create an event page with a venue, agenda, speakers and partners. Use Beams registration form or connect third-party services for registering attendees.

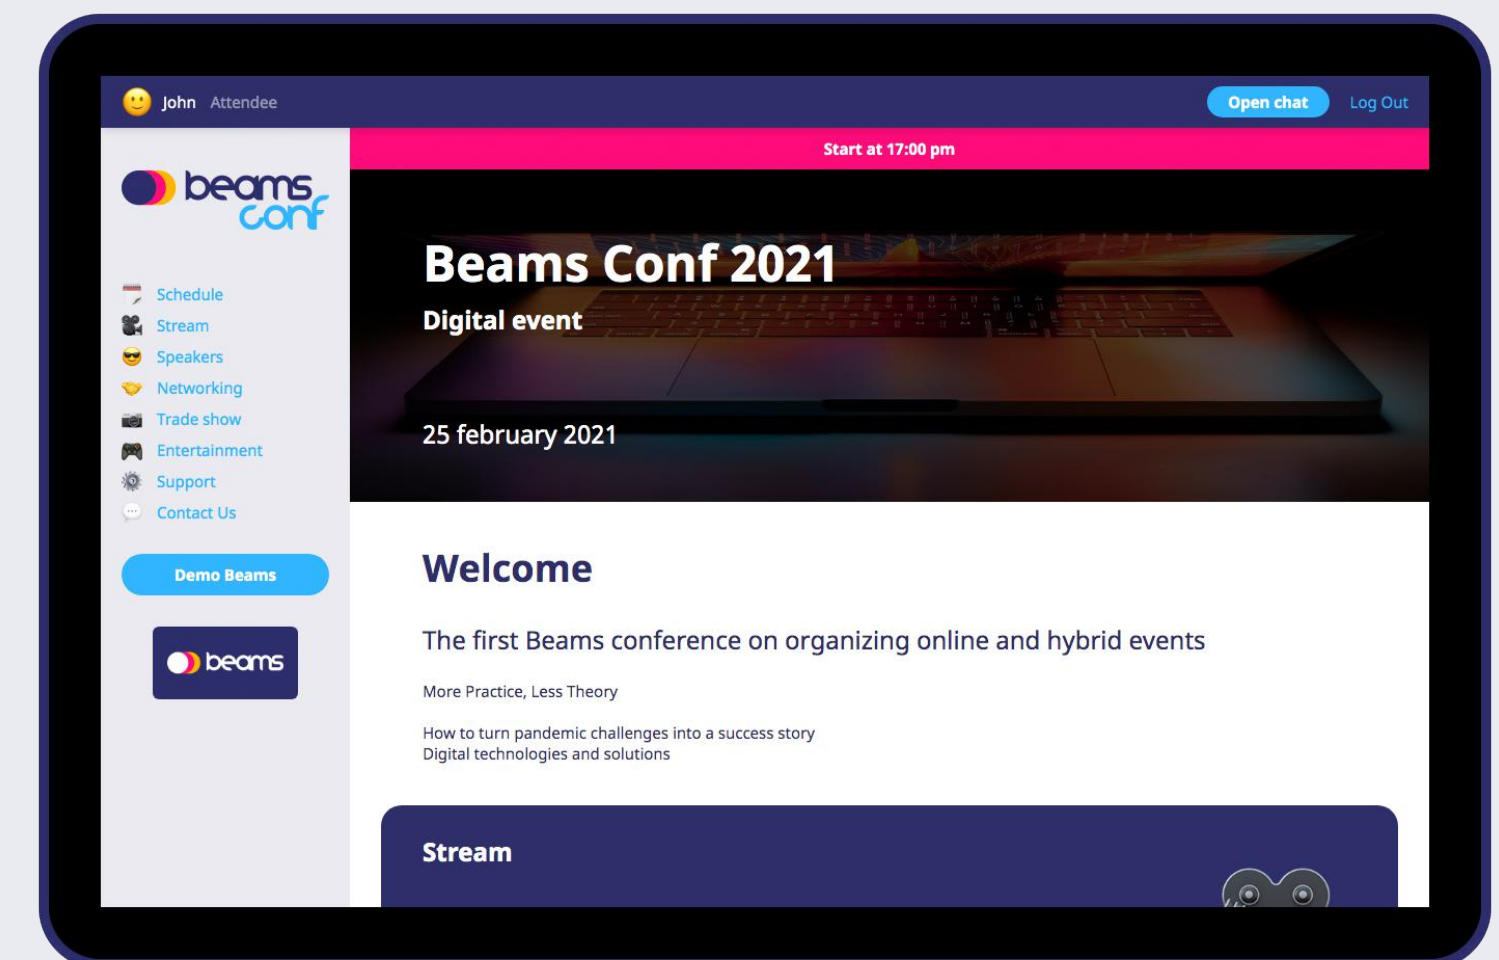

High standards of streaming

Live events with up to 100,000 attendees can be hosted on the Beams platform. You can be sure that your event will run smoothly.

Unique domains

Select a unique domain name in the beams.pro zone, for example, conf.beams.pro or link any other external domain to our platform.

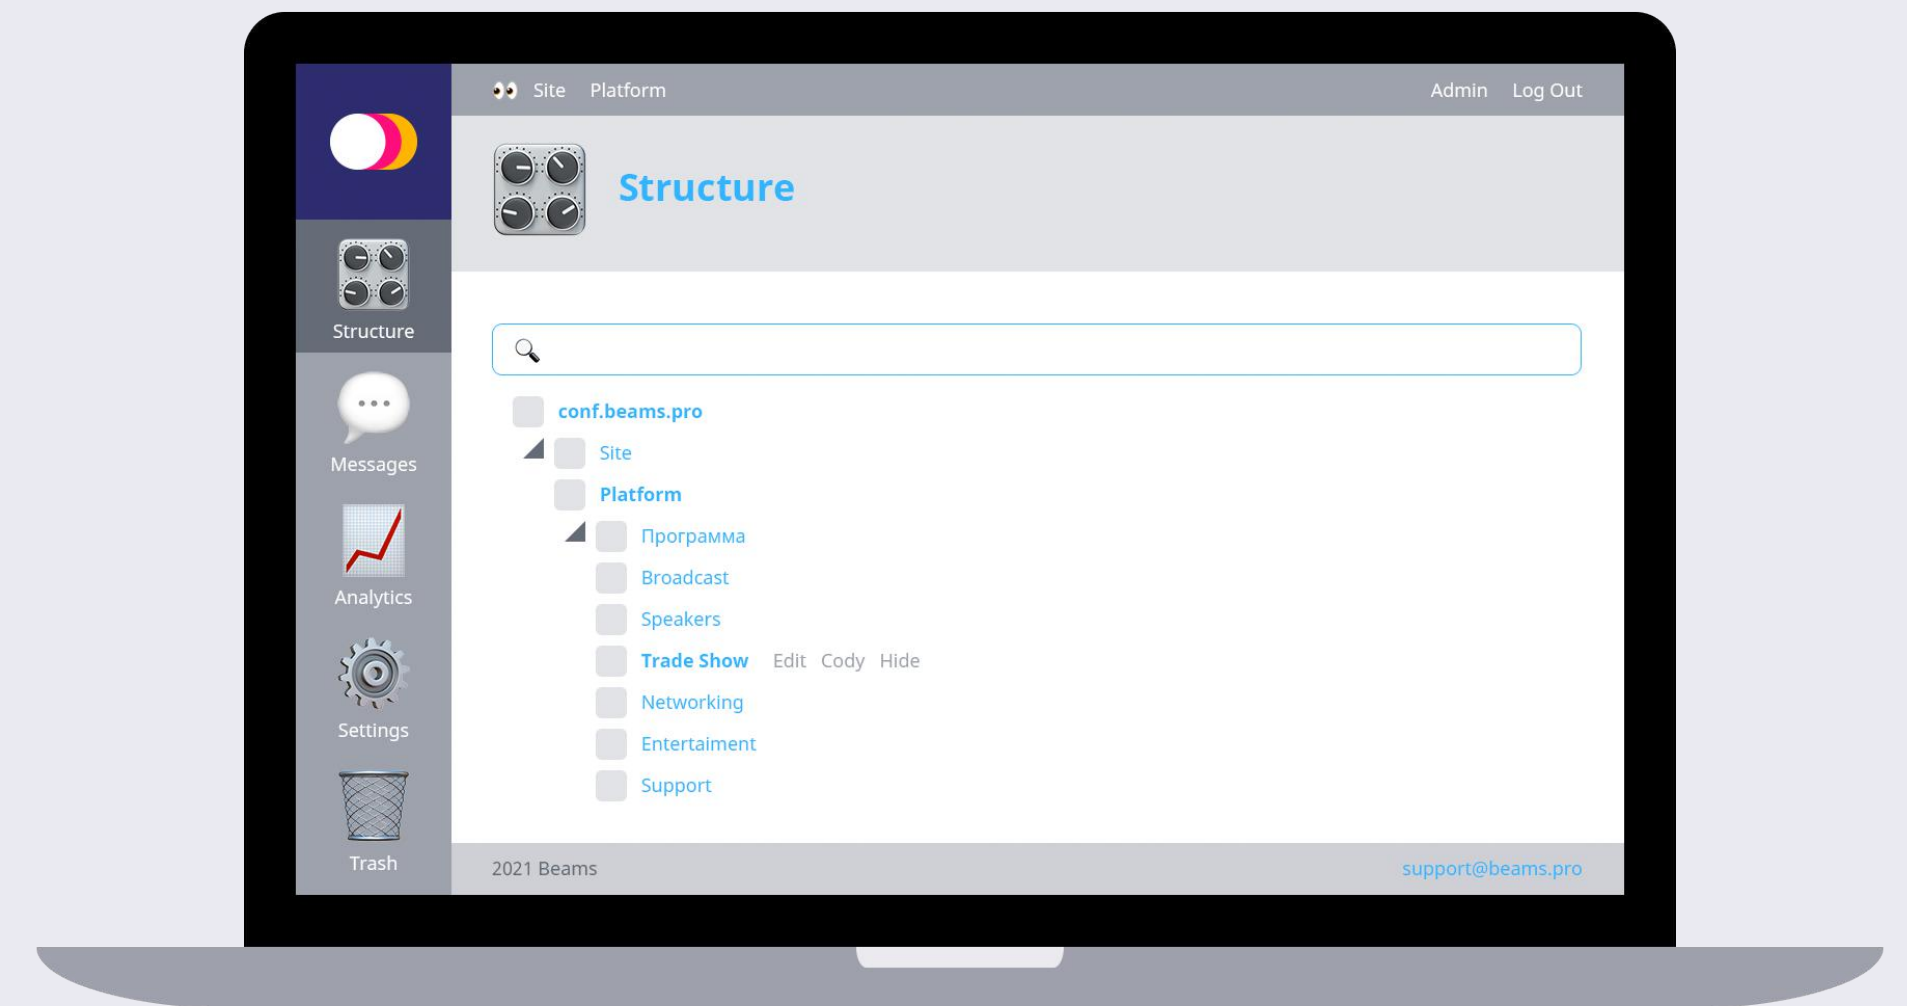

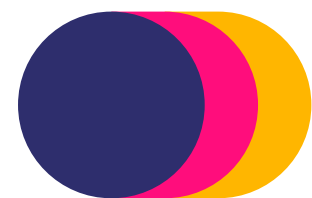

**The platform is compatible with most devices:
desktops, laptops, tablets, mobile phones, Smart TVs.**

Manage your event easily

Simple and user-friendly interface allows you to set up and launch your online event with no effort. Easily add event information, set user access levels and get full analytics at any time.

Attendees

When your attendee registers for an event, their profile is created with their contact information and access level.

Notifications

Keep your attendees informed of all changes via emails, chats and popups.

Analytics

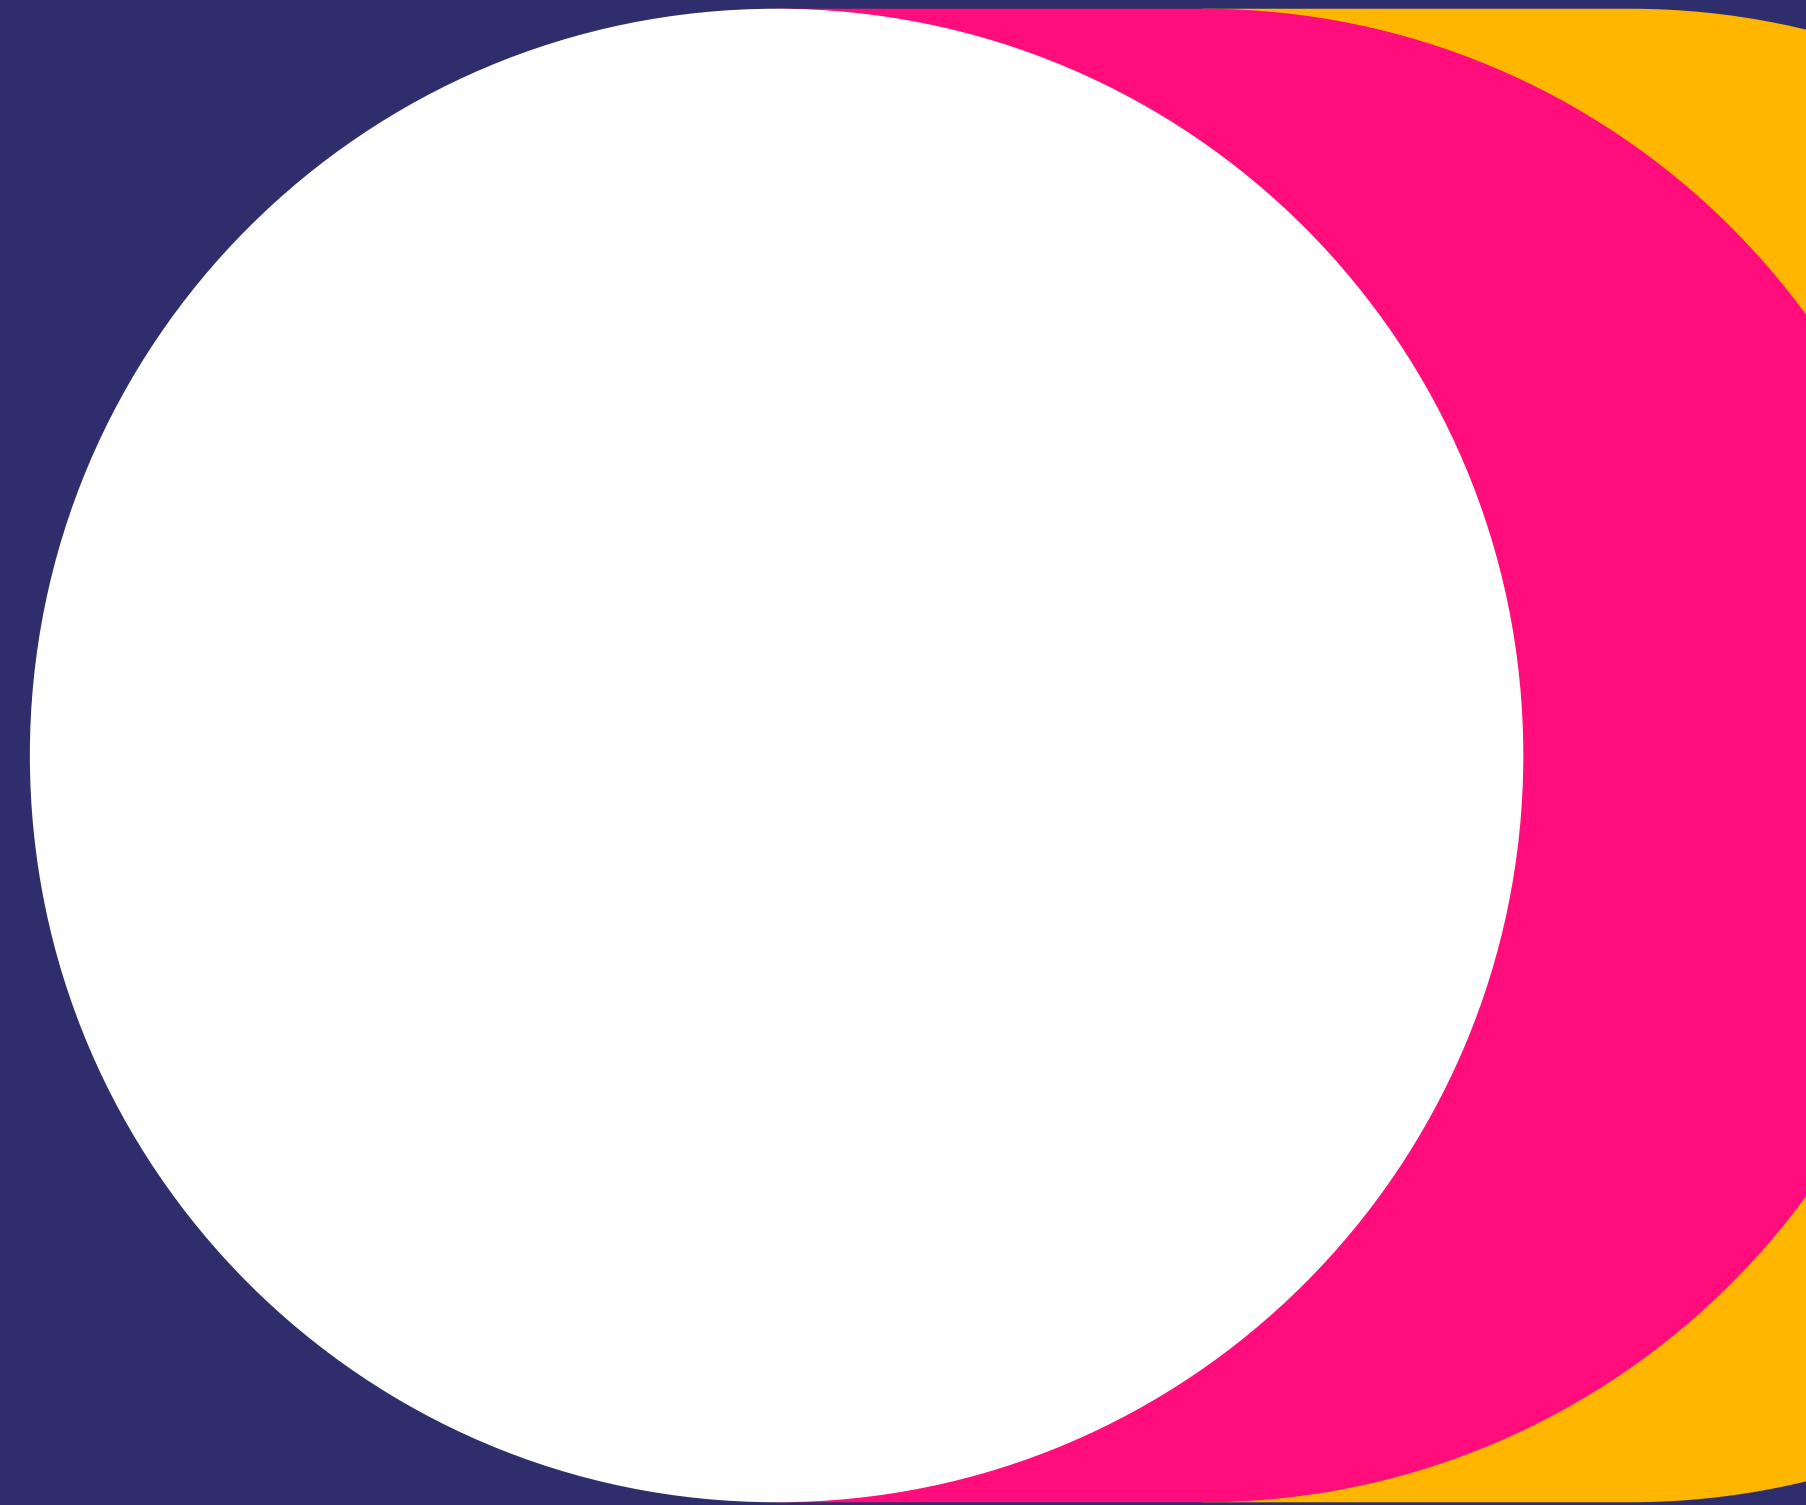

Download all the attendee data after an event to see the whole picture and evaluate the results.

Integrations

Connect third-party services using the Beams API.

**Host and manage
your live and hybrid
events with Beams**

Conferences

Professional and industry conferences with easy-to-use networking tools.

Summits/Forums

Host large-scale global forums using multiple streams.
